**Re: Lehigh South Townhomes  
85 and 135 Lehigh Station Road (174.04-1-21.1; 174.04-1-21.2)  
Letter of Intent – Request for Site Plan and Subdivision Approval**

Dear Supervisor Schultz and Members of the Board:

On behalf of our client, East River Henrietta LLC, we respectfully submit the attached materials for consideration of a Site Plan approval and subdivision approval at the July 18, 2023 Board meeting.

### **Project Description**

The project is to construct 58 multifamily townhome buildings in 36.5 acres on the south side of Lehigh Station Road and East River Road. Each townhome will consist of 2 to 4 single-family units per building with a total unit count of  $\pm 224$  units. In addition to the site plan approval, we are also submitting a subdivision application for preliminary subdivision approval. We are proposing to subdivide the existing two parcels (85 and 135 Lehigh Station Rd) into 226 lots. The subdivision application includes the entire 79.96 acres of both existing parcels. The site plan application only includes the proposed 36.5 acres of single-family dwellings on the south-eastern section of the site. The northern portion of the site has not changed any of the previously proposed land uses. Since the original approval, the Town has implemented additional zoning regulations that include a mixed-use overlay.

This project meets all the mixed-use overlay requirements, including but not limited to buffer, greenspace, and parking regulations, throughout the development. The project includes new roadways, sidewalks, trails, public water, sanitary sewers, pump station, and storm water management areas. A trip generation is attached to the application package. The federal wetlands on both parcels will not be disturbed, and an existing Cultural Resource Area on the north side of Lehigh Station Road will be protected.

Please refer to the list of properties with site information, materials sheets, elevations, and floor plans all provided as part of this application review package.

We look forward to presenting this application on July 18, 2023.

In support of our request, attached please find:

**Traffic Analysis**  
**Revised May 22, 2023**

The purpose of this letter is to provide a trip generation assessment related to the proposed project consisting of ±352 apartment units, 224 single family lots and ±300,000 SF of Industrial buildings to be located at the 84, 85, and 135 Lehigh Station Road.

A Traffic Impact Study was performed by McFarland Johnson dated November 10, 2020 analyzing the same project area. At that time, the project scope consisted of 325 residential units and 500,000 SF of Industrial buildings.

**Proposed Development**

Data contained in Trip Generation, 11th Edition, published by the Institute of Transportation Engineers (ITE) was used to project the volume of traffic generated by the proposed development. Data published by the ITE is the nationally accepted standard for generating trips for new uses. Table I summarizes the volume of projected site trips during the weekday AM and PM peak hours.

**PROPOSED TRIP GENERATION**

LEHIGH NORTH RESIDENTIAL						
Dependent Factor (X):	Independent Factor (X=Dwelling Units) (X=352)					
	Rate/Formula	Total	Enter		Exit	
AM Peak Hour:	$T = 0.44(X) - 11.61$	130	30	23%	100	77%
PM Peak Hour:	$T = 0.39(X) + 0.34$	138	84	61%	54	39%

LEHIGH SOUTH RESIDENTIAL						
Dependent Factor (X):	Independent Factor (X=Dwelling Units) (X=224)					
	Rate/Formula	Total	Enter		Exit	
AM Peak Hour:	$T = 0.44(X) - 11.61$	87	20	23%	67	77%
PM Peak Hour:	$T = 0.39(X) + 0.34$	88	54	61%	34	39%

LEHIGH SOUTH INDUSTRIAL						
ITE Use:	ITE CODE 130 - General Light Industrial					
Dependent Factor (X):	Independent Factor (X=1000 Sq. Ft. GFA) (X=300)					
	Rate/Formula	Total	Enter		Exit	
AM Peak Hour:	$T = 0.68(X) + 3.81$	102	83	81%	19	19%
PM Peak Hour:	$\ln(T) = 0.72 \ln(X) + 0.38$	102	22	22%	80	78%

The table below compares the proposed 2023 Trip Generations to those developed in the McFarland Johnson Traffic Impact Study, dated November 10, 2020.

**PROPOSED TRIP GENERATION COMPARISON**

	AM Peak Hour			PM Peak Hour		
	Enter	Exit	Total	Enter	Exit	Total
<b>2023 Proposed</b>	133	186	319	160	168	328

<b>Trip Gen Difference</b>	-59	61	2	31	-46	-15

Using the AM and PM trip generations from the tables above, a summary of estimated trip distributions to East River Road can be found in the table below. Trip distribution percentages were used from the McFarland Johnson TIS.

**PROPOSED TRIP DISTRIBUTION**

LEHIGH SOUTH RESIDENTIAL TRIP DISTRIBUTION TO EAST RIVER ROAD						
	AM			PM		
	DIST.	Total	% Total	DIST.	Total	% Total
<b>Entering</b>	60%	20	12	60%	54	32
<b>Exiting</b>	60%	67	40	60%	34	21
<b>Total</b>		87	52		88	53

**Conclusions**

While there is minor variation in the projected AM and PM Peak Hour site generated traffic based on the proposed land use modifications, the total trips generated remains similar to those proposed by the previously submitted November 2020 TIS. Given these considerations, no further study is warranted or recommended.

**Instructions for Completing Part 1**

**Part 1 is to be completed by the applicant or project sponsor.** Responses become part of the application for approval or funding, are subject to public review, and may be subject to further verification.

Complete Part 1 based on information currently available. If additional research or investigation would be needed to fully respond to any item, please answer as thoroughly as possible based on current information; indicate whether missing information does not exist, or is not reasonably available to the sponsor; and, when possible, generally describe work or studies which would be necessary to update or fully develop that information.

Applicants/sponsors must complete all items in Sections A & B. In Sections C, D & E, most items contain an initial question that must be answered either "Yes" or "No". If the answer to the initial question is "Yes", complete the sub-questions that follow. If the answer to the initial question is "No", proceed to the next question. Section F allows the project sponsor to identify and attach any additional information. Section G requires the name and signature of the applicant or project sponsor to verify that the information contained in Part 1 is accurate and complete.

**A. Project and Applicant/Sponsor Information.**

Name of Action or Project: Lehigh Mixed-Use Development		
Project Location (describe, and attach a general location map): 84 Lehigh Station (174.02-1-43), 85 Lehigh Station (174.04-1-21.1), and 135 Lehigh Station Road (174.04-1-21.2); NE/SE corner E. River Road		
Brief Description of Proposed Action (include purpose or need): The proposal is to construct a mixed-use development including multifamily dwellings, townhouses, and commercial/industrial buildings of three properties totaling 137 +/- acres. The proposed project consists of ± 236 single family lots, ±352 apartment units, and ±300,000 SF of Industrial space to be located at the northeast and southeast corner of Lehigh Station Road and East River Road. A Special Use Permit was previously approved for ±500,000 SF of Industrial space on the south side of Lehigh Station Road. We are requesting a new Special Use permit to modify the approval by replacing some Industrial Space on the south side with an additional residential area on the southern side of Lehigh Station Road with ±236 single family dwellings. The northern portion of the site has not changed any of the previously proposed land uses. Since the original approval, the Town has implemented additional zoning regulations that include a mixed-use overlay. This project meets all the mixed-use overlay requirements, including but not limited to buffer, greenspace, and parking regulations, throughout the development. The project includes new roadways, sidewalks, trails, public water, sanitary sewers, pump station, and storm water management areas. The federal wetlands on both parcels will not be disturbed, and an existing Cultural Resource Area on the north side of Lehigh Station Road will be protected.
