AS ACTED UPON DURING A DULY NOTICED OPEN MEETING OF THE TOWN BOARD OF THE TOWN OF HENRIETTA, COUNTY OF MONROE, STATE OF NEW YORK, HELD AT THE HENRIETTA TOWN HALL AT 475 CALKINS ROAD, HENRIETTA, NEW YORK ON MAY 24, 2023 AT 6:00 P.M.

RESOLUTION #12-193/2023

To issue an amended SEQR Negative Declaration for the Lehigh Mixed Use Development at the corner of East River Road and Lehigh Station Road.

On Motion of Councilmember Bellanca Seconded by Councilmember Bolzner

WHEREAS, Town Board Resolution #6-82/2021, passed on March 26, 2021, made a SEQR determination and issued a Negative Declaration for the proposal known as "Lehigh Mixed Use Development" located at the corner of East River Road and Lehigh Station Road, the applicant being Commercial Street Partners, which proposal sought approval to construct a mixed-use development comprising of apartments and industrial buildings on lands located on the northeast and southeast corners of the intersection of Lehigh Station Road and East River Road, including parcels with Tax Parcel Nos. 174.02-1-43, 174.04-1-21.1, and 174.04-1-21.2, or as more particularly described in plans on file in the Town Clerk's Office; and

WHEREAS, the Town has recently received an application from East River Henrietta LLC to amend the Mixed-Use Special Use Permit for this project (the "Application") with a proposal to replace a portion of the area originally proposed to be comprised of industrial buildings at the 135 Lehigh Station Road parcel, Tax Parcel #174.04-1-21.2, with for-sale townhomes (said portion comprising approximately 19.67 acres), while retaining the remainder of the proposed industrial use (approximately 34.26 acres); and

WHEREAS, the resulting amended plan retains a mix of industrial, residential, commercial, and civic space with respective percentages all within the ranges specified by Henrietta Town Code §295-34.2 for the Mixed-Use Employment Area Overlay District within which the project is located, and which also include the extension of proposed East River Road Multi-Modal Path that the Town is in the process of constructing along East River Road; and

WHEREAS, presentations and public hearings were held relating to the project, including on April 24, 2023 at the Town Board Workshop and on April 26, 2023 and May 24, 2023 at the Town Board Meetings, at which all feedback and concerns from neighbors, residents, and Town Board members were heard and considered; and

WHEREAS, the application was referred to and reviewed by Monroe County; and

WHEREAS, should the proposed changes not result in any significant adverse environmental impacts, they may be assessed pursuant to 6 NYCRR 617.7 via an amended Negative Declaration; and

WHEREAS, the Town Board has carefully considered and taken a hard look at all potential environmental impacts of the proposed changes to the project, carefully considering all documentary, testimonial, and other evidence presented to the Town Board prior to, at, and subsequent to the public hearings, together with any input from Town staff, and any applicable advisory boards and agencies; and

WHEREAS, the Town Board has completed amended Parts 2 and 3 of the EAF, which are attached hereto, and have carefully considered the information contained therein.

THEREFORE, BE IT RESOLVED, that the Henrietta Town Board hereby approves the attached amended Part 2 of said EAF.

BE IT FURTHER RESOLVED, that the Town Board hereby finds that the proposed changes will not have any significant adverse environmental impacts, as more fully set forth herein, in the record, and in the amended Part 3 of the EAF, including in the attached "Amended EAF Part 3 Narrative," attached thereto.

BE IT FURTHER RESOLVED, that the Town Board hereby approves the amended Part 3 of the EAF, confirming its findings in Part 2 of the EAF, and setting forth its basis and reasoning for finding that there continue to be no potential significant adverse environmental impacts.

BE IT FURTHER RESOLVED, that in accordance with its adoption of the amended Part 3 of the EAF, the Town Board hereby issues an amended Negative Declaration with regard to the action, finding that the proposed changes will not have any significant adverse environmental impacts, along with its original finding that the original plans will not have any significant adverse environmental impacts.

BE IT FURTHER RESOLVED, that the Town Board hereby directs that the Amended Negative Declaration be filed in accordance with SEQR Regulations, that the Supervisor is authorized to execute such necessary documents and to take such other actions as will facilitate an orderly and proper SEQR process.

#### Full Environmental Assessment Form Part 1 - Project and Setting

# **Instructions for Completing Part 1**

**Part 1 is to be completed by the applicant or project sponsor.** Responses become part of the application for approval or funding, are subject to public review, and may be subject to further verification.

Complete Part 1 based on information currently available. If additional research or investigation would be needed to fully respond to any item, please answer as thoroughly as possible based on current information; indicate whether missing information does not exist, or is not reasonably available to the sponsor; and, when possible, generally describe work or studies which would be necessary to update or fully develop that information.

Applicants/sponsors must complete all items in Sections A & B. In Sections C, D & E, most items contain an initial question that must be answered either "Yes" or "No". If the answer to the initial question is "Yes", complete the sub-questions that follow. If the answer to the initial question is "No", proceed to the next question. Section F allows the project sponsor to identify and attach any additional information. Section G requires the name and signature of the applicant or project sponsor to verify that the information contained in Part 1 is accurate and complete.

#### A. Project and Applicant/Sponsor Information.

Name of Action or Project: Lehigh Mixed-Use Development

Project Location (describe, and attach a general location map):

84 Lehigh Station (174.02-1-43), 85 Lehigh Station (174.04-1-21.1), and 135 Lehigh Station Road (174.04-1-21.2); NE/SE corner E. River Road

Brief Description of Proposed Action (include purpose or need):

| The proposal is to construct a mixed-use development including multifamily dwellings, totaling 137 +/- acres. The proposed project consists of ± 236 single family lots, ±352 at the northeast and southeast corner of Lehigh Station Road and East River Road. A Industrial space on the south side of Lehigh Station Road. We are requesting a new S Industrial Space on the south side with an additional residential area on the southerns or the regulations that include a mixed-use overlay. This project meets all the mixed-use overlay, and parking regulations, throughout the development. The project include pump station, and storm water management areas. The federal wetlands on both par the north side of Lehigh Station Road will be protected. | apartment units, and ±300,000 \$<br>Special Use Permit was previou<br>pecial Use permit to modify the<br>side of Lehigh Station Road with<br>. **Disclaimer:** The EAF Mapper is a screening tool intended to assist project sponsors and reviewing agencies in preparing an environmental assessment form (EAF). Not all questions asked in the EAF are answered by the EAF Mapper. Additional information on any EAF question can be obtained by consulting the EAF Workbooks. Although the EAF Mapper provides the most up-to-date digital data available to DEC, you may also need to contact local or other data sources in order to obtain data not provided by the Mapper. Digital data is not a substitute for agency determinations.

# Full Environmental Assessment Form Agency Use Only [If applicable] Project : Lehigh Station Mixed-Use Amendment Date : 5/18/2023

**Part 2 is to be completed by the lead agency.** Part 2 is designed to help the lead agency inventory all potential resources that could be affected by a proposed project or action. We recognize that the lead agency's reviewer(s) will not necessarily be environmental professionals. So, the questions are designed to walk a reviewer through the assessment process by providing a series of questions that can be answered using the information found in Part 1. To further assist the lead agency in completing Part 2, the form identifies the most relevant questions in Part 1 that will provide the information needed to answer the Part 2 question. When Part 2 is completed, the lead agency will have identified the relevant environmental areas that may be impacted by the proposed activity.

If the lead agency is a state agency **and** the action is in any Coastal Area, complete the Coastal Assessment Form before proceeding with this assessment.

#### **Tips for completing Part 2:**

- Review all of the information provided in Part 1.
- Review any application, maps, supporting materials and the Full EAF Workbook.
- Answer each of the 18 questions in Part 2.
- If you answer "Yes" to a numbered question, please complete all the questions that follow in that section.
- If you answer "No" to a numbered question, move on to the next numbered question.
- Check appropriate column to indicate the anticipated size of the impact.
- Proposed projects that would exceed a numeric threshold contained in a question should result in the reviewing agency checking the box "Moderate to large impact may occur."
- The reviewer is not expected to be an expert in environmental analysis.
- If you are not sure or undecided about the size of an impact, it may help to review the sub-questions for the general question and consult the workbook.
- When answering a question consider all components of the proposed activity, that is, the "whole action".
- Consider the possibility for long-term and cumulative impacts as well as direct impacts.
- Answer the question in a reasonable manner considering the scale and context of the project.

| <ol> <li>Impact on Land<br/>Proposed action may involve construction on, or physical alteration of,<br/>the land surface of the proposed site. (See Part 1. D.1)<br/>If "Yes", answer questions a - j. If "No", move on to Section 2.</li> </ol> | □NO                               |  | YES   |
|--|-----------------------------------|--|---|
|  | Relevant<br>Part I<br>Question(s) | No, or<br>small<br>impact<br>may occur | Moderate<br>to large<br>impact may<br>occur |
| a. The proposed action may involve construction on land where depth to water table is less than 3 feet.  | E2d                               |  |   |
| b. The proposed action may involve construction on slopes of 15% or greater.   | E2f                               |  |   |
| c. The proposed action may involve construction on land where bedrock is exposed, or generally within 5 feet of existing ground surface.   | E2a                               |  |   |
| d. The proposed action may involve the excavation and removal of more than 1,000 tons of natural material.   | D2a                               |  |   |
| e. The proposed action may involve construction that continues for more than one year or in multiple phases.   | Dle                               |  |   |
| f. The proposed action may result in increased erosion, whether from physical disturbance or vegetation removal (including from treatment by herbicides).  | D2e, D2q                          |  |   |
| g. The proposed action is, or may be, located within a Coastal Erosion hazard area.  | Bli                               | $\checkmark$                           |   |
| h. Other impacts:  |                                   |  |   |

| 2. Impact on Geological Features<br>The proposed action may result in the modification or destruction of, or inhib<br>access to, any unique or unusual land forms on the site (e.g., cliffs, dunes,<br>minerals, fossils, caves). (See Part 1. E.2.g)                                  | it<br>🗸 NC                        |  | YES   |
|--|-----------------------------------|--|---|
| If "Yes", answer questions a - c. If "No", move on to Section 3.   | Relevant<br>Part I<br>Question(s) | No, or<br>small<br>impact<br>may occur | Moderate<br>to large<br>impact may<br>occur |
| a. Identify the specific land form(s) attached:  | E2g                               |  |   |
| b. The proposed action may affect or is adjacent to a geological feature listed as a registered National Natural Landmark.<br>Specific feature:  | E3c                               |  |   |
| c. Other impacts:  |                                   |  |   |
|  | I                                 | I                                      |   |
| <ul> <li>3. Impacts on Surface Water</li> <li>The proposed action may affect one or more wetlands or other surface water bodies (e.g., streams, rivers, ponds or lakes). (See Part 1. D.2, E.2.h)</li> <li>If "Yes", answer questions a - l. If "No", move on to Section 4.</li> </ul> |                                   |  | YES   |
|  | Relevant<br>Part I<br>Question(s) | No, or<br>small<br>impact<br>may occur | Moderate<br>to large<br>impact may<br>occur |
| a. The proposed action may create a new water body.  | D2b, D1h                          |  |   |
| b. The proposed action may result in an increase or decrease of over 10% or more than a 10 acre increase or decrease in the surface area of any body of water.   | D2b                               |  |   |
| c. The proposed action may involve dredging more than 100 cubic yards of material from a wetland or water body.  | D2a                               |  |   |
| d. The proposed action may involve construction within or adjoining a freshwater or tidal wetland, or in the bed or banks of any other water body.   | E2h                               |  |   |
| e. The proposed action may create turbidity in a waterbody, either from upland erosion, runoff or by disturbing bottom sediments.  | D2a, D2h                          |  |   |
| f. The proposed action may include construction of one or more intake(s) for withdrawal of water from surface water.   | D2c                               |  |   |
| g. The proposed action may include construction of one or more outfall(s) for discharge of wastewater to surface water(s).   | D2d                               |  |   |
| h. The proposed action may cause soil erosion, or otherwise create a source of stormwater discharge that may lead to siltation or other degradation of receiving water bodies.   | D2e                               |  |   |
| i. The proposed action may affect the water quality of any water bodies within or downstream of the site of the proposed action.   | E2h                               |  |   |
| j. The proposed action may involve the application of pesticides or herbicides in or around any water body.  | D2q, E2h                          |  |   |
| k. The proposed action may require the construction of new, or expansion of existing, wastewater treatment facilities.   | D1a, D2d                          |  |   |

| <ul> <li>4. Impact on groundwater The proposed action may result in new or additional use of ground water, or may have the potential to introduce contaminants to ground water or an aquif (See Part 1. D.2.a, D.2.c, D.2.d, D.2.p, D.2.q, D.2.t) If "Yes", answer questions a - h. If "No", move on to Section 5.</li></ul> | er.                               |  | YES   |
|--|-----------------------------------|--|---|
|  | Relevant<br>Part I<br>Question(s) | No, or<br>small<br>impact<br>may occur | Moderate<br>to large<br>impact may<br>occur |
| a. The proposed action may require new water supply wells, or create additional demand<br>on supplies from existing water supply wells.  | D2c                               |  |   |
| b. Water supply demand from the proposed action may exceed safe and sustainable withdrawal capacity rate of the local supply or aquifer.<br>Cite Source:   | D2c                               |  |   |
| c. The proposed action may allow or result in residential uses in areas without water and sewer services.  | D1a, D2c                          |  |   |
| d. The proposed action may include or require wastewater discharged to groundwater.  | D2d, E21                          |  |   |
| e. The proposed action may result in the construction of water supply wells in locations where groundwater is, or is suspected to be, contaminated.  | D2c, E1f,<br>E1g, E1h             |  |   |
| f. The proposed action may require the bulk storage of petroleum or chemical products over ground water or an aquifer.   | D2p, E2l                          |  |   |
| g. The proposed action may involve the commercial application of pesticides within 100 feet of potable drinking water or irrigation sources.   | E2h, D2q,<br>E2l, D2c             |  |   |
| h. Other impacts:  |                                   |  |   |
| 5 Impact on Flooding   |                                   |  | <u>.</u>                                    |

| 5. Impact on Flooding<br>The proposed action may result in development on lands subject to flooding.<br>(See Part 1. E.2) | NO                                | $\checkmark$                           | YES   |
|---|-----------------------------------|--|---|
| If "Yes", answer questions a - g. If "No", move on to Section 6.  | Relevant<br>Part I<br>Question(s) | No, or<br>small<br>impact<br>may occur | Moderate<br>to large<br>impact may<br>occur |
| a. The proposed action may result in development in a designated floodway.  | E2i                               |  |   |
| b. The proposed action may result in development within a 100 year floodplain.  | E2j                               |  |   |
| c. The proposed action may result in development within a 500 year floodplain.  | E2k                               |  |   |
| d. The proposed action may result in, or require, modification of existing drainage patterns.                             | D2b, D2e                          |  |   |
| e. The proposed action may change flood water flows that contribute to flooding.  | D2b, E2i,<br>E2j, E2k             |  |   |
| f. If there is a dam located on the site of the proposed action, is the dam in need of repair, or upgrade?                | E1e                               |  |   |

| g. Other impacts:  |   |  |   |
|--|---|--|---|
| <ul> <li>6. Impacts on Air The proposed action may include a state regulated air emission source. (See Part 1. D.2.f., D.2.h, D.2.g) If "Yes", answer questions a - f. If "No", move on to Section 7. </li> </ul>  | NC  |  | YES   |
|  | Relevant<br>Part I<br>Question(s)             | No, or<br>small<br>impact<br>may occur | Moderate<br>to large<br>impact may<br>occur |
| <ul> <li>a. If the proposed action requires federal or state air emission permits, the action may also emit one or more greenhouse gases at or above the following levels: <ol> <li>More than 1000 tons/year of carbon dioxide (CO<sub>2</sub>)</li> <li>More than 3.5 tons/year of nitrous oxide (N<sub>2</sub>O)</li> <li>More than 1000 tons/year of carbon equivalent of perfluorocarbons (PFCs)</li> <li>More than 1000 tons/year of sulfur hexafluoride (SF<sub>6</sub>)</li> <li>More than 1000 tons/year of carbon dioxide equivalent of hydrochloroflourocarbons (HFCs) emissions</li> <li>vi. 43 tons/year or more of methane</li> </ol> </li> </ul> | D2g<br>D2g<br>D2g<br>D2g<br>D2g<br>D2g<br>D2h |  |   |
| b. The proposed action may generate 10 tons/year or more of any one designated hazardous air pollutant, or 25 tons/year or more of any combination of such hazardous air pollutants.   | D2g   |  |   |
| c. The proposed action may require a state air registration, or may produce an emissions rate of total contaminants that may exceed 5 lbs. per hour, or may include a heat source capable of producing more than 10 million BTU's per hour.  | D2f, D2g                                      |  |   |
| d. The proposed action may reach 50% of any of the thresholds in "a" through "c", above.   | D2g   |  |   |
| e. The proposed action may result in the combustion or thermal treatment of more than 1 ton of refuse per hour.  | D2s   |  |   |
| f. Other impacts:  |   |  |   |
| <ul> <li>7. Impact on Plants and Animals         The proposed action may result in a loss of flora or fauna. (See Part 1. E.2. n             If "Yes", answer questions a - j. If "No", move on to Section 8.     </li> </ul>  | nq.)  | NO                                     | YES   |

# PRINT FULL FORM

#### Full Environmental Assessment Form Part 3 - Evaluation of the Magnitude and Importance of Project Impacts and Determination of Significance

Part 3 provides the reasons in support of the determination of significance. The lead agency must complete Part 3 for every question in Part 2 where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.

Based on the analysis in Part 3, the lead agency must decide whether to require an environmental impact statement to further assess the proposed action or whether available information is sufficient for the lead agency to conclude that the proposed action will not have a significant adverse environmental impact. By completing the certification on the next page, the lead agency can complete its determination of significance.

#### **Reasons Supporting This Determination:**

To complete this section:

- Identify the impact based on the Part 2 responses and describe its magnitude. Magnitude considers factors such as severity, size or extent of an impact.
- Assess the importance of the impact. Importance relates to the geographic scope, duration, probability of the impact occurring, number of people affected by the impact and any additional environmental consequences if the impact were to occur.
- The assessment should take into consideration any design element or project changes.
- Repeat this process for each Part 2 question where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.
- Provide the reason(s) why the impact may, or will not, result in a significant adverse environmental impact
- For Conditional Negative Declarations identify the specific condition(s) imposed that will modify the proposed action so that no significant adverse environmental impacts will result.
- Attach additional sheets, as needed.

Please refer to attached Part 3 Reasoned Elaboration relating to the determination of no significant adverse impact for the Proposal known as the Lehigh Station Mixed-Use Amended Negative Declaration project on Lehigh Station Road at East River Road in the Town of Henrietta, NY (Monroe County).

|                          | Determinati        | ion of Significance -    | Type 1 and U | Unlisted Actions |  |
|--------------------------|--------------------|--------------------------|--------------|------------------|--|
| SEQR Status:             | Type 1             | Unlisted                 |              |                  |  |

|  |
| and considering both the magnitude and importance of each identified potential impact, it is the conclusion of the<br>Henrietta Town Boardas lead agency that:   |
| A. This project will result in no significant adverse impacts on the environment, and, therefore, an environmental impact statement need not be prepared. Accordingly, this negative declaration is issued.  |
| B. Although this project could have a significant adverse impact on the environment, that impact will be avoided or substantially mitigated because of the following conditions which will be required by the lead agency:   |
|  |
| There will, therefore, be no significant adverse impacts from the project as conditioned, and, therefore, this conditioned negative declaration is issued. A conditioned negative declaration may be used only for UNLISTED actions (see 6 NYCRR 617.7(d)).  |
| C. This Project may result in one or more significant adverse impacts on the environment, and an environmental impact statement must be prepared to further assess the impact(s) and possible mitigation and to explore alternatives to avoid or reduce those impacts. Accordingly, this positive declaration is issued. |

#### May 18, 2023

In addition to the narrative below, this EAF Part 3 narrative, which comprises a portion of the Amended Negative Declaration for the relevant project, hereby incorporates the following, which is made a part of this Part 3 reasoned elaboration, and which therefore is a part of the basis for the SEQR determination:

- a. <u>Special Use Permit Application SUP 2023-012</u> (for an amended mixed-use), including all attachments and supplemental materials.
- b. <u>Special Use Permit Application SUP 2023-013</u> (for the town home component of the amended mixed-use), including all attachments and supplemental materials.
- c. <u>Special Use Permit Application SUP 2021-017</u> (for the original mixed-use), including all attachments and supplemental materials.
- d. <u>Special Use Permit Application SUP 2021-029</u> (for a component of the original mixed-use), including all attachments and supplemental materials.
- e. <u>All SEQR Materials related to SUP 2021-017 and SUP 2021-029</u>, including the EAF Part 1, EAF Part 2, EAF Part 3 and the EAF Part 3 Narrative.
- f. <u>"Traffic Analysis"</u> letter submitted by Passero Associates in concert with the 2023 SUP Applications.
- g. <u>Letter of Intent from Passero Associates for "Lehigh Station South"</u>, dated March 20, 2023.
- h. <u>Letter from Christopher Reeve, PE from the New York State Department of</u> <u>Transportation to Christopher E. Martin, PE of the Town of Henrietta</u>, dated March 30, 2023.
- i. <u>Letter from Adam J. Bello, Monroe County Executive to Stephen L. Schultz</u>, dated April 17, 2023.

This SEQR Analysis, including the EAF Part 2, EAF Part 3, and this Narrative, specifically incorporates the SEQR analysis related to SUP 2021-017 and SUP 2021-029 and all underlying materials relating to the same, including the reasoning and basis elaborated therein, and carries forth the same, except as amended and modified as set forth herein.

Overall, the Town Board finds that the proposed changes from replacing 200,000 sf of industrial space with approximately 224 single family attached dwellings generate essentially the same traffic, pursuant to the updated Traffic Analysis, have a reduced amount of impervious surface, pursuant to the updated Concept Plan, and have a greater amount of green space, pursuant to the updated Concept Plan, further reducing the potential for environmental impacts from the previous approval.

The comparison of the eighteen impact items in EAF Part 2 are described in more detail between the change in use from industrial to single family attached dwellings (townhomes) as follows:

#### 1. Impact on Land

The minor impacts on land between the previous industrial building application and the current townhome project are very similar since both applications will have construction periods that will last for more than one year and will require multiple phases. Also, the amount of land that will be disturbed is slightly less with the proposed townhome project then it is with the industrial application.

#### 2. Impact on Geological Features

There will be no impact since there are no geological features in the area.

#### 3. Impacts on Surface Water

The impact on the surface waters will be the same. The existing wetlands will need to be protected during construction and the application will need to provide a stormwater management facility that meets the Town and New York State Department of Environmental Conservation requirements.

The action has the potential to create turbidity and sediment in the adjacent water bodies if the proper erosion control devices are not implemented or properly maintained. However, a Stormwater Pollution Prevention Plan (SWPPP) will be used to protect surface water. Additionally, the SWPPP shall use sedimentation basins, stone check dams, stabilized construction entrances, silt fence, and other erosion control devices to control site erosion. Also, site inspections will be performed weekly until the site is stabilized to ensure that erosion is not leaving the site.

#### 4. Impacts on Groundwater

The change in use will not have an increased impact on groundwater.

#### 5. Impacts on Flooding

No change; the project is not located within a 100 year floodplain per the Community Floodplain Map.

#### 6. Impacts on Air

The impact on air will be about the same between the change in uses from industrial to residential.

#### 7. Impacts on Plants and Animals

No change; there are no endangered plants or animals located within the project area.

#### 8. Impacts on Agricultural Resources

The change in use will not have an increased impact on groundwater.

#### 9. Impact on Aesthetic Resources

No change; there are no aesthetic resources located within the project area.

#### **10.** Impact on Historic and Archeological Resources

A portion of the site is located within an archaeological sensitive area, so the applicant completed a Phase IA and a Phase IB Archeological Survey as requested by the New York State Office of Parks, Recreation and Historic Preservation. The results of this survey indicated that there were archeological findings on the north side of Lehigh Station Road but none on the south side.

#### **11.** Impact on Open Space and Recreation

Additional open space and trails will be provided by the proposed single family attached dwellings, so the impact will be positive.

# **12.** Impact on Critical Environmental Areas

No change; there are no critical environmental areas located within the proposed development.

#### **13.** Impact on Transportation

Per the traffic analysis prepared by Passero Associates, there are approximately six less vehicle trips that will be generated by swapping 200,000 sf of industrial space with approximately 224 single family attached dwellings. In addition, the potential truck traffic will be reduced from 207 to 2 trips per day.

Also, the applicant will need to pay SEQR mitigation fees since the project is located within the East River Road corridor.

#### 14. Impact on Energy

The impact on energy with the change in use will most likely be similar due to all the newer energy efficient devices that will be utilized in the townhomes. Also, it's possible that there could have been a high energy user in one of the industrial buildings which would increase the demand on energy usage.

#### **15.** Impact on Noise, Odor, and Light

The impact on light spillage will be slightly less with the proposed townhomes because the 16' light poles will be shorter than the 24' to 30' poles that would be used in an industrial setting. The impact on noise and odor will be about the same.

#### 16. Impact on Human Health

The impact on human health will be slightly better because there will be approximately 200 less trucks utilizing the East River Road and Lehigh Station Road corridors due to the elimination of 200,000 sf of industrial area.

#### **17.** Consistency with Community Plans

The proposal to add additional single family attached dwelling units on the south side of Lehigh Station Road is consistent with the 2003 Town of Henrietta Comprehensive Plan.

The removal of 200,000 sf of industrial space and replacing it with 224 single family attached dwelling units on the south side of Lehigh Station Road complements the existing apartments on the north side of the road and is consistent with the character of the surrounding neighborhood along East River Road. The proposed change to this project better aligns with the character of the mixed-sue overlay district which requires specific percentages of industrial, commercial, residential, and civic spaces for new developments.

# **18.** Consistency with Community Character

See Section 17.
